

DIGITUS Gigabit Injetor PoE, 802.3af

DN-95102-1
EAN 4016032441120

Gigabit Ethernet PoE Injector, 802.3af Power Pins:4/5(+),7/8(-), 15.4W

Com o auxílio do injetor PoE Digitus reduza os seus custos em cabos na instalação de dispositivos compatíveis com PoE, como, por exemplo, câmaras de rede IP. A alimentação dos dados, bem como de energia para os seus dispositivos realiza-se apenas através de um cabo Ethernet. Assim, a colocação de um cabo de energia separado torna-se desnecessária e, deste modo, poderá ampliar a sua rede onde não existem tomadas ou condutas de eletricidade. O injetor é completamente compatível com a norma IEEE 802.3af PoE, fornecendo uma potência de saída de 15,4 Watt.

Reduza os seus custos com cabos para aplicações sem fios, telefones IP ou qualquer outro dispositivo compatível com PoE!

- Em conformidade com a norma 802.3af PoE
- Tensão de saída 48 Volt, 15,4 Watt
- Entrada LAN RJ45

- Saída LAN (RJ45), fonte de alimentação através de pino: 4/5(+), 7/8(-)
- Ligação de cabo: 10/100/1000 Mbps
- A saída dispõe de uma limitação de corrente, um dispositivo de proteção contra curto-circuito, bem como de uma deteção de equipamento final e classificação automáticas
- Consumo de energia: Máx. 1,6W
- Fonte de alimentação: 100-240 V CA, 0,8 A
- Temperatura de funcionamento: -5°C - 45°C
- Dimensões (mm): 134 (C) x 56 (L) x 33 (A)
- PoE standard: IEEE802.3af (PoE)
- Ethernet speed: Gigabit
- Industrial usage: no

Package contents

- Injetor PoE
- Peso: 20 g
- Cabo de alimentação

Safety notes

- This product is intended for indoor use only.
- Read all instructions and follow all warnings and instructions on the device.
- Do not place this appliance on an unstable surface (such as a trolley, stand, table, etc.).
- Do not use this appliance near water.
- Do not place this appliance near or above a radiator.
- The housing is equipped with openings for heat dissipation and ventilation. To prevent overheating during operation, the ventilation openings must not be blocked or covered.
- Do not place the appliance on a soft surface (e.g. bed, sofa, blanket, etc.). This will block the ventilation.
- The appliance must not be installed in a closed environment if adequate ventilation is not guaranteed.
- Do not spray any liquids onto the appliance.
- Disconnect the mains plug before cleaning. Do not use any liquid or foam cleaners.
- Clean the appliance with a damp cloth.
- Connect the device according to the power supply on the rating plate.
- To prevent damage to the appliance, it is important that all appliances are properly earthed.
- Do not place any objects on the power cable and lay it in such a way as to avoid tripping hazards.
- Use a surge protector, a regulator or an uninterruptible power supply (UPS) to protect your system from sudden, temporary and reduced power.
- Secure the system cable and mains cable properly and ensure that no objects are pressing on the cable.
- Do not insert any objects into the appliance through the openings in the housing. There is a risk of a short circuit, which can lead to fire or electric shock.
- Do not attempt to repair the appliance yourself. Always contact an authorized customer service centre.
- If any of the following conditions occur, unplug the appliance and return it to an authorized service centre for repair
 - The mains cable, power supply unit or plug for the power supply is damaged or worn;
 - Liquid has penetrated the appliance;
 - The device has been exposed to rain or water;
 - The device has been dropped or the housing has been damaged;
 - The function of the device has obviously changed;
- The appliance cannot be operated as described in the operating instructions.
