

DIGITUS Инжектор PoE, 802.3af

DN-95102-1
EAN 4016032441120

Gigabit Ethernet PoE Injector, 802.3af Power Pins:4/5(+),7/8(-), 15.4W

Использование инжектора Digitus PoE позволяет сократить расход кабеля при установке устройств с поддержкой технологии PoE, например, сетевых IP-камер. Загрузка данных, а также электропитание устройств осуществляется только по сетевому кабелю Ethernet. Прокладка отдельного кабеля электропитания не требуется, что позволяет усовершенствовать сеть там, где отсутствуют розетки и кабели электропитания. Инжектор полностью соответствует стандарту IEEE 802.3af PoE и обеспечивает выходное напряжение 15,4 Вт.

Позволяет сократить расход кабеля для беспроводных точек доступа, IP-телефонов и любых PoE-устройств.

- Соответствует стандарту 802.3af PoE
- Выходное напряжение 48 В, 15,4 Вт
- Вход LAN RJ45
- Выход LAN (RJ45), контакты питания: 4/5(+), 7/8(-)

- Кабельное соединение: 10/100/1000 Мбит/с
- Выход оснащен ограничителем тока нагрузки, предохранителем для защиты от коротких замыканий, а также функцией автоматического конечного распознавания и классификации устройства
- Потребляемая мощность: не более 1,6 Вт.
- Питание: 100-240 В перем. тока, 0,8 А
- Рабочая температура: -5°C – 45°C
- Размер (мм): 134 (Д) x 56 (Ш) x 33 (В)
- PoE standard: IEEE802.3af (PoE)
- Ethernet speed: Gigabit
- Industrial usage: no

Package contents

- Инжектор PoE
- Краткое практическое руководство
- Силовой кабель

Safety notes

- This product is intended for indoor use only.
- Read all instructions and follow all warnings and instructions on the device.
- Do not place this appliance on an unstable surface (such as a trolley, stand, table, etc.).
- Do not use this appliance near water.
- Do not place this appliance near or above a radiator.
- The housing is equipped with openings for heat dissipation and ventilation. To prevent overheating during operation, the ventilation openings must not be blocked or covered.
- Do not place the appliance on a soft surface (e.g. bed, sofa, blanket, etc.). This will block the ventilation.
- The appliance must not be installed in a closed environment if adequate ventilation is not guaranteed.
- Do not spray any liquids onto the appliance.
- Disconnect the mains plug before cleaning. Do not use any liquid or foam cleaners.
- Clean the appliance with a damp cloth.
- Connect the device according to the power supply on the rating plate.
- To prevent damage to the appliance, it is important that all appliances are properly earthed.
- Do not place any objects on the power cable and lay it in such a way as to avoid tripping hazards.
- Use a surge protector, a regulator or an uninterruptible power supply (UPS) to protect your system from sudden, temporary and reduced power.
- Secure the system cable and mains cable properly and ensure that no objects are pressing on the cable.
- Do not insert any objects into the appliance through the openings in the housing. There is a risk of a short circuit, which can lead to fire or electric shock.
- Do not attempt to repair the appliance yourself. Always contact an authorized customer service centre.
- If any of the following conditions occur, unplug the appliance and return it to an authorized service centre for repair
 - The mains cable, power supply unit or plug for the power supply is damaged or worn;
 - Liquid has penetrated the appliance;
 - The device has been exposed to rain or water;
 - The device has been dropped or the housing has been damaged;
 - The function of the device has obviously changed;
- The appliance cannot be operated as described in the operating instructions.
