

DIGITUS Network Rack Unique Series - 800x1000 mm (WxD)

DN-31124
EAN 4016032476443

42U network cabinet, Unique, 2053x800x1000 mm double glass front door, grey

The network cabinets from the Unique series were developed for especially convenient and flexible network cabling. Inlets in the roof and floor equipped with brushes (starting with 26 rack units and a cabinet width of 800 mm), a sliding inlet in the floor structure with foam rubber seal and brush management panels on the back above and below the rear door (starting with 26 rack units) enable versatile use in a wide range of application scenarios. Vertical cable channels with brackets installed next to the profile rails (starting with a cabinet width of 800 mm) round off the design. An offset, removable cover with ventilation slits ensures enhanced air circulation. This features a special design for easy mounting of a fan module. Two pairs of galvanized 483 mm (19") profile rails labeled with rack units readable in both directions are installed on the inside. Their depth is adjustable and they are connected to additional depth bars in the cabinet. Each cabinet is made of up to 1.5 mm thick sheet steel. Coloring is done with electrostatic powder coating in the standard colors gray (RAL 7035) or jet black (RAL 9005). Side walls and doors that can be locked or removed in a modular design improve accessibility. The door hinges can be switched. Furthermore, the cabinets can be completely dismantled if necessary due to their collapsible design.

The DIGITUS® Unique Series is made for high demand IT-Infrastructure Solutions - designed and developed on highest standard in Germany

- Double folding glass front door
- Lock system with pivot lever on front door (ready for profile half cylinder; adapter included)
- Steer rear door with a round lock, double folding
