PURELINK HDFury Dr. HDMI - EDID Management, Handshake Repair

HDF0060-1
EAN 3589487456021

No Compatibility Problems The DR. HDMI EDID Manager solves all problems occuring from incompatible EDID data from HDMI connections because it only forwards the chosen EDID to the source device. The device is provided with a total of eight EDID modes, two of which are programmable by the user and a following which is automatically detecting the EDID of the screen, forwarding it to the source device. The Latest Generation The DR. HDMI EDID Manager solves all problems occuring from incompatible EDID data from HDMI connections because it only forwards the chosen EDID to the source device. The device is provided with a total of eight EDID modes, two of which are programmable by the user and a following which is automatically detecting the EDID of the screen, forwarding it to the source device. The Latest Generation Our DR. HDMI complies with the latest HDMI standard - HDMI High Speed. It supports resolutions up to 4K (2160p) and is downward compatible with all former HDMI specifications. Length Matters Passive HDMI cables can transmit a 1080p signal over a maximum of 15 meters. From this length on, the loss of signal is too high resulting in static, image interferences or simply empty sceens. The integrated HDMI repeater within the Dr. HDMI is a smart HDMI repeater and enhances the maximum cable length between video source and play back device with an external power supply at full HDTV resolution to up to 50 meters. Always Up-to-Date The integrated USB port within the DR. HDMI allows for firmware updates by the user - new software can therefore always be implemented and update the device via laptop or PC. The USB port furthermore acts as power supply for the repeater. Custom-fit, Durable and Without Losses The highly precise manufactured and custom-fit 24-carat gold-plated pins guarantee a perfect transmission and permanently lasting functionality. For Professional Purposes and Installations The DR. HDMI is manufactured in only the most modern production facilities and is tested a 100% before shipping. During the manufacturing process, it undergoes over ten quality tests, making it the most reliable choice on the market.

- High-quality materials, custom-fit plugs and couplings, gold-plated pins as well as waiving unnecessary parts, PureInstall products are a good investment for any field of use.

Attributes

- AOC - Active Optical Cable: no
