

# DIGITUS Wireless LAN Rod Antenna

**DN-70100**  
**EAN 4016032179221**

**Wireless LAN omnidirectional antenna Gain: 5 dBi, RP-SMA connector**

Wireless LAN omnidirectional antenna, Gain: 5 dBi, RP-SMA connector, 19.5cm

**Expands the Wireless LAN in range and coverage - Improves the wireless signal quality**

- Wireless LAN high performance rod antenna
- Frequency range: 2.4GHz - 2.4835GHz
- Gain: 5dBi (reception)

- Omnidirectional
- Suitable for 2.4GHz Wireless LAN
- Connection via RP-SMA socket
- Length: 19.7cm, diameter: 12mm
- Suitable for all DIGITUS® Wireless LAN products
- Suitable stands for antenna: DN-70101 or DN-70106

**Package contents**

- Wireless LAN rod antenna, 5 dBi

**Safety notes**

- The performance of the antenna depends heavily on the location. Ensure that the antenna is installed in a location that allows optimum signal distribution, without obstacles such as thick walls or metal objects.
- To avoid sources of interference, antennas should not be installed near electrical devices such as microwaves, radios or other strong sources of

interference, as these can affect the signal.

- Avoid direct contact with salty air or other corrosive environments that could damage the antenna or connections.
- Check the antenna regularly for damage, loose connections or dirt. Dust or dirt on the antenna or the connections can significantly impair the signal quality.
- Make sure that the frequency of the antenna matches your network adapter or router.
- Ensure that the antenna in conjunction with the network adapter or router complies with local standards and approvals.

**EU responsible person**

EU based economic operator ensuring the product complies with the required regulations.
