EAN 4016032368007

HDMI to VGA converter adapter Typ A - VGA (D-Sub) connector, 3,5mm audio jack

The DIGITUS DA-70461 converts digital HDMI signals into analog VGA signals. Modern playback devices, such as notebooks, Blu-ray players, DVD players, game consoles, etc., can be connected with older VGA monitors or projectors. The converter is also equipped with a 3.5 mm audio jack. Any existing audio signal is converted in parallel. This enables additional audio playback by connecting your speakers or surround sound system.

Safety notes

- If the device is powered by a plug-in power supply, ensure that the power adapter is connected correctly and meets the specified requirements (e.g. voltage and current).
- Only use certified CAT5e or CAT6 cables to ensure stable signal transmission.
- For particularly long cable runs or in environments prone to interference, it is recommended to use shielded network cables.
- Make sure that all connections are tight and secure to avoid loose contacts that could affect the signal quality. Make sure that the HDMI and Ethernet connections are connected correctly.
- Make sure that the CAT cable is not laid near high-voltage power lines or other strong sources of electromagnetic interference to avoid signal interference.
- Only operate the device within the specified temperature range.
- Do not use the device outdoors or in damp or wet environments
- Check all connections and cables regularly for wear or damage. Cables and connections can wear out, especially with frequent use or long installations, which can lead to poor signal quality or system failure.
